

Public Parking Lot Expansion [click for architectural design](#)

- Insufficient parking space was the number one issue identified in 2016-2019 Strategic Plan
- Currently only one designated handicapped spot
- Expansion needed to accommodate increase in population served and program attendance

When the library offers popular movie series or bigger family events, it is always an issue for seniors and the general public to find available parking. There are also not enough handicapped spots. The lack of available parking is potentially keeping people from coming to the library, and was the number one issue identified in the 2016-2019 Strategic Plan survey.

Expansion proposals of 14 spaces or 21 spaces, including 2 designated handicapped spots, are being considered.
